BIGGER...BETTER...MEANER THAN EVER!

3-D View!

And *EYE II* gives you more — *much more!*

Through a clearing in the haunting forest, three massive towers rise into the night sky — the dread Temple Darkmoon is just ahead! Like a siren, it inexorably draws you into its night-marish depths...

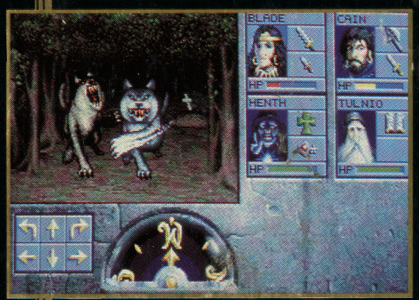
BIGGER! A bigger adventure includes forest, temple, catacomb and three huge towers. The bigger story gives you more people to meet, clues to learn and mysteries to unravel!

The exciting sequel to *Eye of the Beholder* is here! *EYE OF THE BEHOLDER II: THE LEGEND OF DARKMOON* is a graphically based AD&D® computer fantasy role-playing saga.

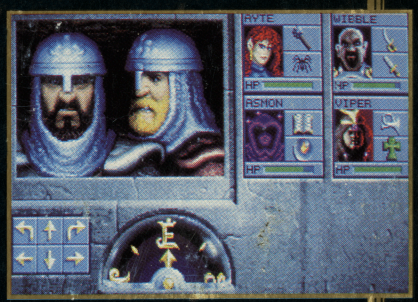
You'll love the stunning pictures, realistic animation and 3-D "you-are-there" point of view.

BETTER! Better graphics and improved "point-and-click" interface make playing even easier.

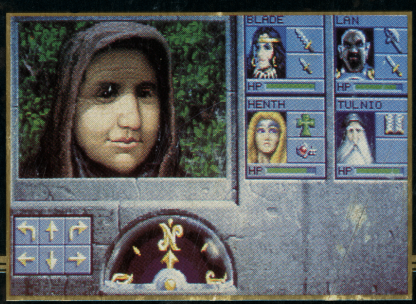
MEANER! There are lots of new, smarter, meaner monsters — some of the nastiest ones are human!



Brave the haunting forest on the way to the dread Temple Darkmoon.



One slip — in combat or in conversation — can bring the whole force of the enemy against you!



Discover the secrets of the characters in and around the Temple!

EYE OF THE BEHOLDER II. Bigger, better, meaner — and more of the best role-playing experience *ever!*
