

Conservation

9. Find places that can use your old toys books and games. Give them to libraries hospitals or the salvation army.
10. Take your own bag out when you go shopping.
11. On short trips ride your bicycle or walk instead of using the car.

Earth - Awareness

12. Take time to put rubbish lying on the ground into rubbish bins.
13. Do not buy anything made from ivory, tortoise shell, coral, reptile skins or furs. These usually come from endangered species.
14. Cut the plastic rings from packs of canned drinks with scissors before you throw them away. In the water they are hard to see and many animals can get caught in them.
15. Products such as plastic bags, fishing lines or polystyrene foam can be deadly to wildlife. Birds and sea creatures can either get caught or mistake them for food so be careful how you dispose of them.

Welcome

Oil spills. Air pollution. Endangered animals. The Award Winning TV Show CAPTAIN PLANET & THE PLANETEERS™ has turned saving the Earth's environment into the ultimate adventure.

And now it's your turn to go up against the most dangerous enemies our environment has ever faced - LOOTEN PLUNDER™ DUKE NUKEM™ HOGGISH GREEDLY™ DOCTOR BLIGHT™ and more.

The forces of earth, fire, wind, water and heart are yours. Put them together and become CAPTAIN PLANET™. Your Eco-copter™ is waiting.

CAPTAIN PLANET & THE PLANETEERS™ - the Amiga computer game - lets you play the role of each of the five Planeteers in an action-packed adventure to defeat the Eco-villains who threaten our

environment.

To succeed in bringing the dastardly Eco-villains to their knees, you must win through five levels of action - playing the part of each Planeteer in turn, learning and harnessing the power of five rings.

Only once all five levels have been successfully completed and the five Planeteers™ are once more reunited can you progress to the final challenge - to play the part of CAPTAIN PLANET™ himself in the decisive showdown against the massed forces of the environmental enemies.

Getting started

Refer to the instruction manual that came with your computer if you need information about setting up your Amiga correctly.

Turn off your Amiga for 20 seconds and turn it on again.

Insert the CAPTAIN PLANET™ disk into your disk drive. The game will load automatically.

Controls

You can play the game using the keyboard or a joystick. If you use a joystick, make sure it is connected to the correct port on the back of your Amiga. Refer to the instruction manual that came with your computer if you need any help.

Keyboard controls

Left
Right
Up/jump
Down
Fire/use ring

Z
X

/
Return

Joystick controls

Move stick left
Move stick right
Move stick up
Move stick down
Hit fire button

Read the descriptions for each level to see how each Planeteer uses their power and how to control them about the screen.

The Game

The game is divided into six levels. The first five levels put you in control of each of the Planeteers in turn - set in a different location against a variety of enemies.

Before each level, GAIA™ explains the fate that has befallen this particular part of the world and explains your quest to you. She will also warn you of the potential dangers that lie ahead - listen to what she says and you will find the quest easier.

Once you have completed the level, GAIA™ will show you an "EXIT" sign which appears on screen showing which way you must go to escape the level.

Fire level

The prince of pollution SLY SLUDGE™ is sending up balloons filled with the harmful CFC gas to destroy the Earth's ozone layer, turning the planet into a huge sun resort for him to build hotels and beaches and ruin the Earth as we know it! It's up to YOU to foil this maniac's evil scheme.

Above the ozone layer are the only survivors of an endangered species of seal. The only way they can return to their natural habitat is to walk across the ozone layer which is in need of repair. You must repair the layer by collecting ozone in the GEO-CRUISER™ and dropping it onto the disappearing layer to rejuvenate it.

Wheeler's controls

Use the joystick or keyboard controls to run and jump around part of this level. Use FIRE to send out a fire burst in the direction you are facing to remove the canisters. Whilst falling use FIRE to create a balloon to break your fall. Shoot

Sludge's balloons with the GEO-CRUISER™ to prevent further damage to the ozone layer. Try to rescue the falling parachutes to get a special bonus. Collect droplets from the ozone pipe on the roof of the GEO-CRUISER™ and deposit the ozone fluid on the layer to patch up the holes.

Water level

LOOTEN PLUNDER™ has stolen the dolphins! The deranged villain Plunder has imprisoned the dolphins in a cruel water prison and will never let them back to the sea unless you use GI™ and the power of water to stop him.

The dolphins must be given a safe route from their tanks high in the sky. Make sure the water pools are full before releasing them - and that the sea is clean enough for them to swim in. Use the ECO-SUB™ to clear out the polluting cans of nuclear waste from the sea to make it blue again.

Gi's controls

Use the normal keys or joystick positions for run and jump. FIRE activates her RING OF POWER which sends out an ice platform. Jump onto the platforms to make your way around the screen. Combine FIRE and DOWN to make the ice platform appear below you. If GI™ falls, use FIRE to create an ice slide below her so that she can glide to safety. To activate the ECO-SUB™, fall into the top of it.

Wind level

You are LINKA™ the eco-conscious sixteen year old from the Soviet Union able to harness the power of wind. Use her RING OF POWER to rescue the ancient Egyptian relics from the clutches of evil. The mutilated face of DR BLIGHT™ now haunts the musty passages and chambers of one of the most spectacular wonders of the world. Blight has planted bombs around the chambers

of the sacred pyramid in a bid to destroy the myth and magic of the former Egyptian kings' glorious resting place.

Using LINKA's Power of Wind you must create cyclones to whisk away the bombs and discarded rubbish to save the pyramid and its treasures from destruction. DR BLIGHT™ will be guarding the exit to prevent you leaving so that should you fail you too will be destroyed in the blast. Only when all bombs have been de-activated will DR BLIGHT™ make good her escape and save her own hideously deformed face.

Linka's controls

Run and jump around the level using the usual controls. The RING OF POWER will cast tornados in the direction you are facing to remove bombs. Whilst under water use the ECO-SUB's Carry-Beam to drop rocks on bombs to destroy them. Whilst falling in the ECO-SUB™ use UP to activate the retro-thrusters to give lift. Go UP to get into the ECO-SUB™.

Heart level

In this level you play the part of MA-TI™, the nature loving teenager from South America. Set in an endangered rain-forest, you must use the RING OF POWER to rebuild the forest and destroy the sources of pollution. Set against you are the evil HOGGISH GREEDLY™ and his mischievous sidekick. RIGGER™.

Your objective is to make your way through the rain-forest, ridding it of the deadly incinerators that are causing it to die. Rejuvenate the trees by wielding your RING OF POWER at the withered stumps and grow them tall and strong again. Climb the new trees to make your way up to the top of the cliff where Hoggish and his horrible henchman have imprisoned the elephants. Use the ECO-COPTER™ to fly in and rescue the captured creatures and deposit them safely down in the elephant sanctuary - but beware of HOGGISH GREEDLY™ - he does not give up easily!

Ma-Ti's controls

Run and jump around the forest using the joystick or keyboard controls above. FIRE will activate the RING OF POWER to send out a shower of hearts into the forest. If you are falling, use the power to create hearts below you to cushion your fall. Use the ring to grow the trees and stop the marauding enemies. Use UP to enter the ECO-COPTER™ and take off.

Earth level

Verminous Scum's henchmen are dumping toxic waste into underground caverns turning the surrounding grassy fields into a disaster area. Scum's twisted henchmen have also trapped pit ponies with the waste who will die if you do not use KWAME™ and his RING OF POWER to rescue them

Crush the pollution filled canisters with Kwame's Earth power to restore richness to the earth around the caverns. Use the ECO-COPTER's safety nets to return the pit ponies to their fields so that they may taste freedom once again.

Kwame's controls

Run, jump and climb around the caverns using the normal controls. FIRE will send out a boulder from his ring to the left or right of you. Single boulders may be moved by pushing into them. Remove boulders by firing at them. Go UP to board the ECO-COPTER™ and rescue the ponies.

The Showdown

An entire nation's safety is in jeopardy! DUKE NUKEM'S obsession for power has drawn him to the Radicore Industries nuclear power station, regarded as the largest of it's kind. He intends to absorb the plant's radiation by causing a full scale nuclear meltdown thus giving him ultimate power. Only the unique powers of the five rings combined can save the day, as CAPTAIN PLANET™ is summoned to put paid to NUKEM's intentions.....GO PLANET!

Captain Planet's controls

Fly around this level using the normal keyboard or joystick commands. To aid CAPTAIN PLANET™, the Planeteers' special powers are scattered around the caverns and may be used once collected. You may hold any two of the Planeteers' special powers throughout gameplay and these will be displayed as icons at the top of the screen. To collect a power, fly into its icon. If you already hold two powers, the currently selected power will be exchanged for it. To change the selected power, hold the FIRE button down. Quickly pressing FIRE will activate the selected power in the direction you are facing.

Fifteen ways to help save the Earth

Household

1. Whenever possible use cloth towels instead of paper ones to clean up spills or dry hands.
2. Don't waste energy! Keep doors and windows closed when the heating is on.
3. Use both sides of scrap paper.
4. Plug electrical equipment into the mains rather than using batteries wherever possible.
5. Use daylight - it's free and doesn't pollute.

School

6. When using art materials remember they're made from the Earth's treasures. Have fun with them and try not to waste them.
7. Tell your teacher you'd like to start a recycling centre in school.
8. Use both sides of scrap paper and exercise book pages.
